

Question Logic Quick Reference Sheet

Important Note:

AND/OR Filter – AND filters are multiple choice filters that, when you select multiple options, search only for tools that do ‘option A’ AND ‘option B’, etc.

In contrast, OR filters search for tools that do either ‘option A’ OR ‘option B’, etc. (i.e., the tool does not have to be both options, as it would with an AND filter).

Guided Search

1. Tool Function - *I need help with...*
 - Filter Type: Checkbox
 - AND filter

2. Topic Area - *What aspect(s) of your topic(s) are you interested in?*
 - Filter Type: Hierarchal Checkbox
 - AND filter
 - Common Issues:
 - Multiples of climate change topics under different header topics
 - Adding too many filters; narrows quickly because it is an AND filter
 - This is an output-based filter, search for relevant tool output topics

3. Location - *Where do you need this tool to work?*
 - Filter Type: Hierarchal Checkbox
 - AND filter

4. Level of Effort - *What level or effort are you willing to put into this tool?*
 - Filter Type: Slider Bar

5. Tool Cost - *How much can you spend on this tool?*
 - Filter Type: Slider Bar
